

Role: Analyst Internship (Paid)

Dolon is a strategic market access and value communications consultancy, specialising in developing market access strategies and shaping policy for medicines to treat rare and severe diseases.

When it comes to treatments for rare and serious diseases, payer systems are complex, multi-layered and different to those for common disorders. With our specialist knowledge, we understand who makes the decisions, how value is determined, and what drives successful results. We are passionate about ensuring that patients with rare disease have equitable access to innovative and potentially life-saving healthcare interventions.

We have an exciting client base of fast-growing companies with innovative and important portfolios of medicines. Working in close partnership, we help them to define and communicate the value of their products to payers, policymakers and society internationally.

Headquartered in London and Zurich, with staff across Europe, Dolon is a dynamic, fast-growing company with a strong reputation and a bright future.

A unique opportunity to work with a young company and be part of an exciting growth period.

We are seeking an intern to join our team. This individual will be responsible for conducting high-quality market access research, using this as a platform for developing compelling market access strategies and policy positions. As part of this role, the individual will deliver findings in the form of clear, creative materials in a variety of formats, with support from other team members. The role will focus primarily on the following types of projects:

- Research into pricing and reimbursement systems and market access policies worldwide
- Development of value strategies to support new medicines
- Understanding and analysing payer perceptions
- Integration of policy considerations into clients' market access strategies
- Communication of findings in clear, compelling materials

Required Qualifications:

University degree/Master's degree/Doctorate (preferably in health economics, outcomes research or pricing/policy, experience in the Life Science / Pharmaceutical industry would be highly valued)

Essential Skills

- Strong research and analytical skills coupled with excellent writing and communication skills
- Ability to anticipate and solve problems independently
- Ability to collaborate and take feedback on board
- Ability to interact with external stakeholders and policy makers
- Attention to detail
- Ability to manage timelines and meet deadlines
- Proficiency with Microsoft Office software (Word, Excel, PowerPoint)

We place particular importance on emotional intelligence and the ability to get along with other people – empathy, maturity and optimism are important values to ourselves and our clients.

Duration:

3 months offered throughout the year – start dates can be flexible according to student requirements. The applicant will be expected to work on a full-time basis of 37.5 hours per week.

Location:

The role will preferably be located at Dolon's offices in London; however we will consider applicants located in Europe. All applicants must be eligible to live and work in the UK and/or the EU.

How to Apply:

For further information about this post or to apply, please email recruitment@dolon.com. When applying for the role, please submit your current CV along with a covering letter.
