

## Definition of the MYMI-inspired framework

A holistic approach to facilitate agreements between manufacturers and payers for the reimbursement of medicines across multiple indications and over several years. It provides a comprehensive structure for assessing therapeutic benefit and managing pricing and reimbursement (P&R) for both current and future indications.

## Key principles of the framework

Scope / eligibility assessment

Mutual commitment

Patient & key opinion leader (KOL) involvement

Flexibility for country implementation

## Overarching components of the framework

**Note:** The framework offers optionality, allowing markets to tailor agreements from a menu of elements according to their needs

### Overarching component I: Establishing the agreement

Horizon scanning & early dialogue

Agreement negotiation & establishment

Agreement lifecycle management

### Overarching component II: Scope and application of the agreement

#### Expedited access

Accelerated early access for new indications

#### Adapted HTA

Abbreviated upfront value assessment for new indications

#### Comprehensive P&R

Pricing agreement covering current & future indications; rapid reimbursement of new indications

#### Comprehensive contracting

Single contract for multiple indications over multiple years

*Early access*

*HTA*

*P&R*

*Contracting*

### Overarching component III: The infrastructure needed for implementation

Legal frameworks

Budgeting mechanisms

Data infrastructure

HTA capability

Policy alignment
